i Description

Look at this fan page I made for the Hidden Figures movie and website!
Not everything is what it seems!

We see a website that looks to have been copied over from an existing site:

Looking at the source code I noticed that the images had some peculiar tags:

Why would there be `base64` data AND other `src` tags?

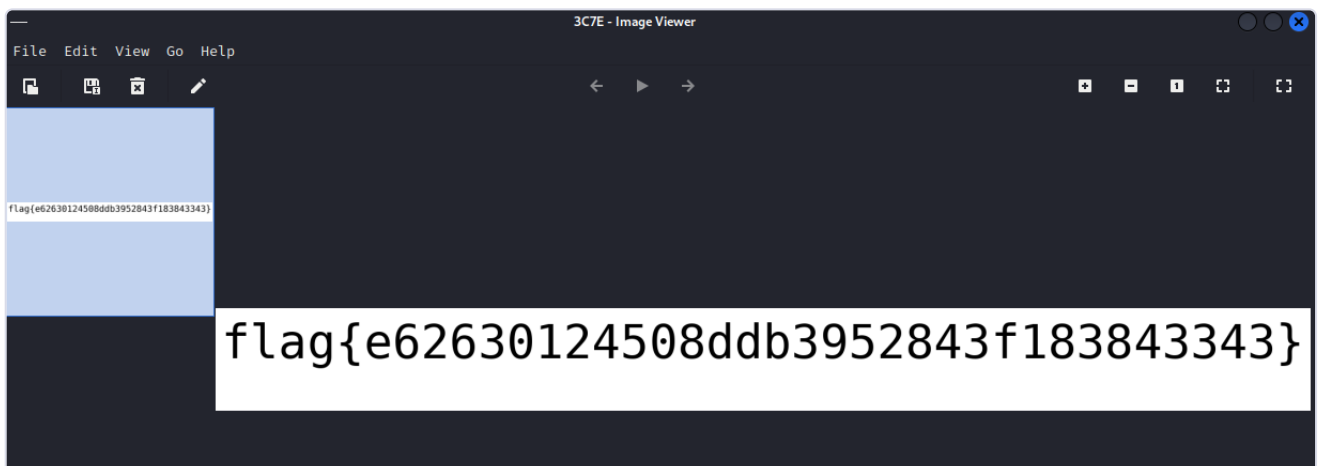

I saved the `base64` data of each of the images to files and inspected the files for anything strange:

```
$ binwalk hidden2
```

DECIMAL	HEXADECIMAL	DESCRIPTION
0	0x0	JPEG image data, JFIF standard 1.01
15486	0x3C7E	PNG image, 1851 x 174, 8-bit/color RGB, non-interlaced
15527	0x3CA7	Zlib compressed data, default compression

The second image appears to have a hidden `png` image inside.

After extracting the file and opening the png it revealed the flag:

flag{e62630124508ddb3952843f183843343}
