

# Blobber

Writeup by Speer

Category: Warmups

Author: JohnHammond

## Description

This file is really... weird...

file: `blobber`

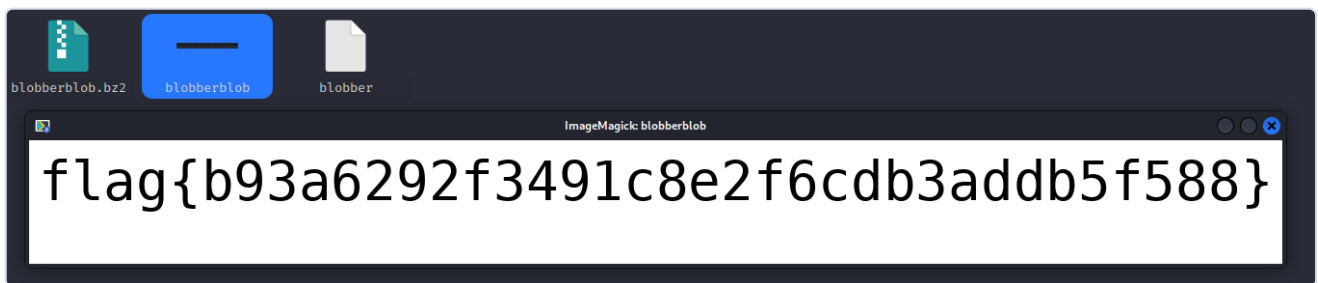

Running `file` :

```
$ file blobber
blobber: SQLite 3.x database, last written using SQLite version
3037002, file counter 4, database pages 10, cookie 0x1, schema 4,
UTF-8, version-valid-for 40
```

it appears to be a sqlite database. Opening it up in a sqlite browser I find a binary large object (BLOB) at `id 238` and export it to a file (I can also just use `binwalk` to extract this).

	id	name	data ▲
	Filter	Filter	Filter
1	238	gA<x(FfEAJ b"^\\9	BLOB
2	1	vMh".}=uFAjMMcEs...	NULL
3	2	K\\wdh?TQOT%V&Q1[	NULL
4	3	F-4D6cA`jsq}6f	NULL
5	4	"MTB2	NULL
6	5	D q#2/en:	NULL
7	6	SeofC-C...	NULL

I used `bzip2 -d blobberblob.bz2` to reveal a `png` file that contained the flag:

flag{b93a6292f3491c8e2f6cdb3addb5f588}
