

# Glasses

Writeup by Speer

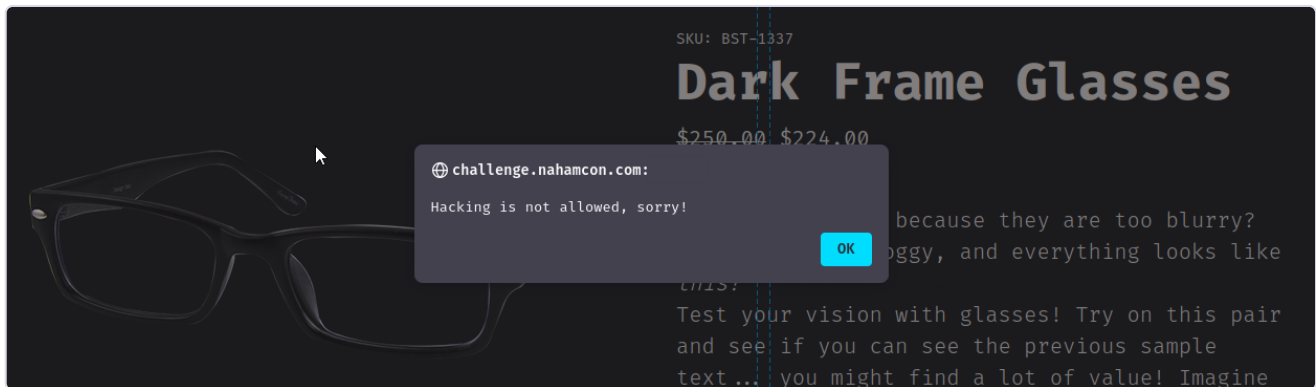

Category: Warmups

Author: JohnHammond

## Description

Everything is blurry, I think I need glasses!

I open a site with some client-side restrictions on right-clicking and highlighting.

looking at the source I can spot the flag between the text but it seems to have used some replacements for the `{}`

```
▼ <p class="lead">
  Can't see things because they are too blurry? Is your vision foggy, and everything looks like
  <em>this?</em>
  [whitespace]
  <span style="color: transparent; text-shadow: rgba(0, 0, 0, 0.09) 0px 0px 0.09em; text-decoration: line-through; --darkreader-inline-color: transparent; data-darkreader-inline-color="">
    flag{8084e4530cf649814456f2a291eb81e9}</span>
  <br>
  Test your vision with glasses! Try on this pair and see if you can see the previous sample text... you might find a lot of value! Imagine the world where you can see clearly
  </p>
▼ <div class="d-flex"> [flex]
  <input id="inputQuantity" class="form-control text-center me-3" type="num" value="1" style="max-width: 3rem">
  ▼ <button class="btn btn-outline-dark flex-shrink-0" type="button">
    ▼ <i class="bi-cart-fill me-1">
      ::before
    </i>
    Buy Now
  </button>
```

flag<sub>1</sub><sup>1</sup>8084e4530cf649814456f2a291eb81e9<sub>2</sub><sup>1</sup>—

fixing this to the flag:

flag{8084e4530cf649814456f2a291eb81e9}
